DETAILED ACTION

This office action is in response to the arguments presented February 7, 2007.

Claims 1-19 are pending.

Allowable Subject Matter

1. Claims 1-19 are allowed. The following is an examiner's statement of reasons for allowance: the closest prior art of record (Kittaka et al. US 2002/0027655 A1) does not teach or reasonably suggest, in combination, the claim limitations as filed in sole independent claim 1. In particular, there is no teaching from the relevant prior art of record or Kittaka et al. '655 that would teach or reasonably suggest a waveguide element as claimed in which the photonic crystal has a refractive index periodicity in at least *two directions perpendicular to a propagation direction*, and further an *incident side phase modulation portion* provided to allow an EM wave that is coupled to a band on or near a *Brillouin zone boundary* in a photonic band structure in the core and propagates in the core to enter the core.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see arguments, filed February 7, 2007, with respect to the 35 U.S.C. 102(b) and 35 U.S.C. 103(a) rejections to claims 1-19 to Kittaka et al. '655 have been fully considered and are persuasive. The rejections of claims 1-19 to Kittaka et al. '655 mailed November 7, 2006 have been withdrawn.
